## Don't Forget About Pentagon-funded Military Aid to Israel

The United States and Israel have had a strong security relationship for decades, including billions of dollars in U.S. military aid. Most observers only consider the \$3.1 billion in State Department's Foreign Military Financing program though. Often not included in figures on U.S. military aid to Israel is the Defense Department-funded military aid, which has included over \$100 million per year since 2002 and peaked in 2014 at \$729 million.
